.NET WEB DEVELOPER JR

I'm a proactive person who believes in the idea that if you can imagine something you can write a code to make it real, I have 2 years of experience so far, and I'm eager to continue expanding my knowledge, available to work under pressure and taking decisions in a short span of time I'm searching a job where I can learn from experienced people and have challenges to improve my ability to solve problems

EDUCATION

2019-Present

Autonomous University Of Tamaulipas

Bachelor of Science in Computer Systems Engineering

SKILLS

- Web API Development with .NET 6+
- Microsoft SQL Server
- Repository Design Pattern
- Entity Framework Core and Dapper as ORM's
- External API Consuming
- Azure Functions

PROFESSIONAL EXPERIENCE

Full Stack Web Developer

Avents, Jun 2021 - Present

Developed a web-application with .NET 6, Razor Pages, Microsoft SQL Server using Stripe to implement a subscription functionality and Twilio and SendGrid along with Azure Functions in order to validate emails and send SMS messages reminders.

Functionalities

- -Implementation of a user authentication system with email validation
- -Full Calendar integration to have a better control over the event's deadlines.
- -Implemented generation of PDF documents with Rotativa to reduce the use of paper documents of the company.
- -SMS messages delivery to remind the clients and the companies about the events they registered.
- -Subscriptions management to give the user the ability to change the level of his subscription.
